WHY DRINK URINE

1. Your urine is your own personal healing liquid full of micronutrients, antidotes and vital information about all your health related issues and problems. It is also the purest and most structured water on the planet, produced by the most advanced filtering machine mother earth has to offer, your own divine and intelligent body. Your body knows exactly the cure you need in any given moment and is capable of producing the remedy you need in order to keep you alive.

2. Your urine is a powerful liquid capable of regenerating your organs and tissues as well as removing and flushing out every harmful parasite, disease and inorganic material in your system when returning this intelligent water of light and life back to your body by drinking every drop of it. Your urine is far from a waste product as you have been taught to believe. It is in fact your real life regenerating water - your true fountain of youth.

Urine has been considered a universal remedy in India for over 5,000 years, with historical roots going

back to ancient Egypt and ancient China. The Hindu refers to this therapy as amaroli while Europeans are more familiar with the term urine therapy.

Drinking one's own urine is an old practice in times of dealing with life-frightening sicknesses, diseases and viruses. Consuming one's own water of life in times of good health has also been an ideal way to further strengthen one's immune system and health and at the same time prevent sickness and disease as well as keeping mental and physical disorders at bay.

HOW TO REMAIN HEALTHY IN BODY AND MIND

Health is a state of being. Good health is about reaching the state of happiness and joy. It is about being able to enjoy the sweetness of life with one's self, family and friends. Good health is also about being able to achieve one's dreams and goals in life. We vitalize, obtain and remain in good health by taking care of our most precious home and vehicle, one's own body.

Good health begins in your mind, mouth, stomach, blood and cells. Good health begins with a balanced pH level in body and mind. Good health is fueling your body with so pure alkalizing fuels as possible. Good health is staying on a pH scale of 7+ by consuming more from nature and less from the manmade world. Nature creates medicine, the profitable man creates drugs and addictions. Stick to nature and be happy. Eat from nature and gain strength and joy to pursue your dreams and goals in life with true inner satisfaction.

MOVING FORWARD

We move forward in life through curiosity. We move forward through knowledge. We move even further forward by knowing oneself. Studying others is only gathering information. Studying oneself is achieving true knowledge. Make time to want to know who and what you truly are. Be more curious in yourself and being. Make part of your life about wanting to know your true being. You are more, much more than you think.

Good luck and be happy so many more can be happy in your happiness.

With love and light
William
